

AspirEase™ Natural

Bio-Nutrition™

Natural Relief for Chronic Arthritis and Pain

A Natural Alternative to Aspirin Based Products!

AspirEase™ Natural is a salicin based, equine supplement that aids in the relief of painful symptoms associated with chronic and long-standing conditions such as arthritis, ringbone, joint disease, soft tissue pain, and old injuries. Salicin, a highly refined and natural precursor to aspirin, offers the same benefits of aspirin while remaining easy on the stomach and reducing the risk of blood thinning. AspirEase™ Natural contains additional buffers to support the gastrointestinal tract, making it the gentlest option for relief of chronic pain. AspirEase™ Natural is microencapsulated and flavor enhanced for optimal palatability.

Active Ingredients per 17 g

Salicin	250 mg
Calcium carbonate	6239 mg
Methylsulfonylmethane (MSM)	1190 mg

Inactive Ingredients

Ground rice hulls, vegetable oil, dried molasses, lecithin, glucose, artificial apple flavoring.
