#### Cautions:

Safe use in pregnant animals or animals intended for breeding has not been proven. If lameness worsens, discontinue use and contact your veterinarian. Administer during or after the animal has eaten to reduce incidence of gastrointestinal upset.

For use in horses only

**MAX-MAX™ is recommended to support normal lung function, to enhance the functions of joint and connective tissues, and to help maintain a healthy intestinal tract.**

**Directions For Use:**

Administer at the rate of 170g (one enclosed scoop) twice per day for seven days. Give at the rate of 85g (1/2 scoop) twice per day thereafter.

**Warnings:**

For animal use only.

Keep out of reach of children and animals. In case of accidental overdose, contact a health professional immediately.

This product should not be given to animals intended for human consumption.
