

## HOOF ARMOR DISPENSER CARTRIDGE CHANGE

Once all of the Hoof Armor has been dispensed the plunger will have moved from the starting position to the ending position. In order to remove the used cartridge follow these steps.

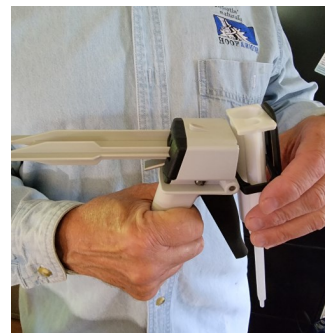

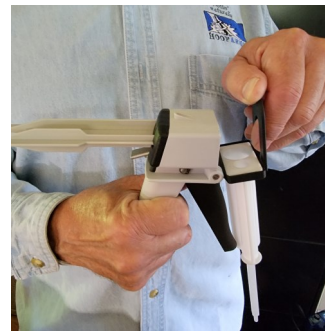

**Step 1.** While lifting up on the silver tab (releasing ratchet mechanism) begin pulling the plunger back into the starting position.

Plunger returned to starting position. It should be pulled until the ratchet mechanism is completely disengaged.

**Step 2.** Grasp the black clip and tilt it open. It has a spring mechanism.

**Step 3.** This will allow removal of the used product cartridge/mixing tip.
