The calorie content is 827 kcal/kg or 12.2 kcal/tbsp.

#1 Selling Brand

Formulated with a special fiber blend for improved gut health and digestion

Highly palatable

Directions for Feeding

Shake gently before use. GM KMR® can be fed as a complete diet for kittens up to 6 weeks old or as a nutritional supplement for weaned kittens, pregnant and nursing

mothers, and adult cats. **Consult your veterinarian for additional advice. Not for human consumption.**

Newborn to 6-Week-Old Kittens: Feed 2 tablespoons (30mL) per 4 ounces (115g) of body weight daily. Kittens should be fed every 3-4 hours. The daily feeding amount should be divided into equal portions for each feeding. Individual kittens' needs may vary. Warm GM KMR to room or body temperature before serving.

Pregnant and Nursing Mothers: Supplement 2 tablespoons (30mL) GM KMR per 5lb (2.2kg) body weight daily, in addition to normal diet.

Weaned Kittens and Adult Cats: Supplement 1 tablespoon (15mL) GM KMR per 5lb (2.2kg) body weight daily, in addition to normal diet.

Storage

Store unopened container in a cool, dry place. Opened container must be refrigerated and discarded after 72 hours. Do not freeze in original container. Use product before best-by date stamped on container.
