- Smells great! Leaves Hair & Mane Soft.
- Recommended by Veterinarians & Trainers.

PREVENT

PROTECT

Use to scientifically clean skin, wounds, hooves, hair & other surfaces prone to host troublesome and contagious pathogens.

Minimize the spread of unsightly, itchy, and contagious skin conditions while cleaning, softening, and strengthening the hair and follicle. Skin, hair and hide issues such as scratches, rain rot, ringworm, mange, thrush, girth itch and other dermatological disorders are troublesome and uncomfortable if not managed. Cleans away and reduces topical pathogens that can cause infections and impede the healing process.

Prevent by Using as Your Primary Shampoo

Keep Your Animals in Top Condition. Use on animals and surfaces that need cleaning or after contacting potentially infectious or pathogen contaminated surface.

Directions for Use:

Expect low level sudsing with this shampoo, even when using a foaming tool. Wet the entire coat- warm water is best. Apply & scrub generously starting with the back of the animal and then work down along both sides, the belly, legs and especially around the hoof area. Rinse thoroughly.

For best results, use in combination with Show Out Equine Skin & Scratches Spray

Most pathogens that cause itching and certain skin conditions don't like to live and grow where this low pH chemistry is sprayed. Gently wipe away crust and massage into and around the affected area. Spray on cuts & open wounds then allow to air dry.

Quarantine potentially infected animals on clean bedding, washing and spraying daily for 7-10 days until symptoms or threat has passed. If symptoms persist, seek the advice of a veterinarian.

Also use to wash your hands, arms, shoes, equipment, trailer, stalls bedding, areas, tools, etc.

Safety: Do not mix with bleach or other chemicals. Keep out of reach of children.

Antibiotic, Alcohol, Steroid & Drug Free, Environmentally Friendly, Biodegradable, Water Soluble, Hypo-allergenic, GRAS Ingredients (Generally Regarded As SAFE)

Ingredients: Proprietary Pro H Technology, food prep Citric and Phosphoric acids, Water, pH adjuster, Muriatic Acid, Sodium Lauryl Sulfate, Decyl Glucoside, Cocomidopropyl Betaine, Tea Tree Oil, Fragrance (100%).
