### A Great All- Around Wound & Skin Cleaning Spray

Spray sores, infected wounds, lacerations, abrasions, itching and other skin irritation. Cleans wound areas, inhibits scarring, minimizes proud flesh and hair loss. Non-drying formula promotes natural wound healing. Broad spectrum effectiveness. Spray as a biosecurity solution for stalls, barns, trailers, tack, brushes, combs, boots & tools. Safe to use around you and your animals to help control the spread of infections. No bandages required. Lick safe. No odor or staining.

**Treat:** Spray or wipe wounds or affected area with a saturated clean cloth. Gently clean skin with **Show out Equine Skin & Scratches**, wiping away crust or debris. Do not rinse. Allow to Air Dry. Apply twice daily for best results. Quarantine your animals until symptom free. Consult your veterinarian if conditions do not start to improve in 7-10 days.

**Prevent:** Spray hair, skin & hooves daily concentrating on areas of concern. Completely wet the skin. Pathogens that cause itching and certain skin disorders don't like to live and grow where this low pH chemistry is sprayed. Concentrate on scrapes, under boots, under bridles, saddles and across the back, sides, neck, ears, head, hips, legs, hooves and any nicks where germs enter the skin to infect. **For best results for prevention:** Use once or twice daily in troublesome areas.

**Safety:** Keep out of reach of children. Topical use only, not intended to be ingested. Avoid contact with eyes as stinging can result, rinse eyes with water. Use within 2 years. Do not mix with bleach or other chemicals. Not approved for human use.

**Ingredients:** Proprietary Pro H Technology, food prep Citric and Phosphoric acids, Water, pH adjuster, Muriatic Acid, and Fragrance (100%).

**Made with Proven Pro H Technology** The low pH chemistry Protecting People & Animals.  
**Made in USA**
